

## Who are we?

Natural Forces develops, constructs, owns, and operates Wind, Solar and Hydro projects across Canada. Our passion is to build projects and relationships that allow us to harness Canada's wonderful and abundant natural resources, in an environmentally responsible and cost effective manner. Established in 2001 in Halifax, Nova Scotia, Natural Forces remains a small company with big values and big ambition. We have teams based in Halifax, New York, and Dublin.

## The Wind Project

Natural Forces is proposing to develop a wind energy project near Benjamins Mill, Nova Scotia. The Benjamins Mill Wind Project would consist of approximately 10 turbines with the capacity to produce approximately 50 MW of clean renewable energy. This proposed project will supply enough electricity to power an estimated 11,250 Nova Scotia homes.

The proposed Benjamins Mill Wind Project is located approximately 10 km southwest of Windsor on private and Crown Land.

## Fact Sheet

### Proposed Project Timeline

Phase	Timeline	Activities	
Development	Q1 2021 to Q4 2022	Start Environmental Studies	Continued Studies
		Submit EA Permitting	First Nations Engagement Community Consultation
Pre-Construction	Q4 2022	Financing	Facilities Studies Agreement
		Wind Turbine Supply Tendering for Construction Contracts	Site Design Final Construction Related Permitting
Construction	Q1 2023 to Q4 2024	Tree Clearing and Grubbing	Electrical Works
		Road Building Foundation Pour	Turbine Assembly Commissioning Project
Operations	Q4 2024 to Q4 2054	Post Construction Monitoring	Monitoring of Turbine Performance
		Annual Monitoring Reports	Maintenance
