Natural Forces is happy to be hosting another open house on the proposed Benjamins Mill Wind Project. This Project will be built in several phases, with a total approximate capacity of 150 MW, or up to 28 turbines. The first phase will consist of up to 8 turbines with an installed capacity of 34 MW.

This open house will be drop-in style, allowing some flexibility for your schedule. We hope to see you there! As part of the development of this Project, we want to ensure that every community member is up-to-date on the goings on of the Project, its permits, and its progress. Natural Forces staff will be present at this event to discuss the Project, permits, environmental assessment, and upcoming construction activities.
