info@naturalforces.ca

Natural Forces is hosting an open house for the proposed Westchester Wind Project! The Project is located about 20 km south of Oxford, just off of Highway 104 near Westchester Mountain. The proposed project will consist of up to 12 turbines, and an installed capacity of approximately 50 MW.

For this open house, we have decided to offer two dates and times to ensure that you, the community, will get the opportunity to meet with us, discuss the project, and have your questions answered. Additionally, the event will be drop-in style, allowing some flexibility for your schedule. We hope to see you there!
